

EFFLORESCENCE CLEANER

Product Description:

Seal King's Efflorescence Cleaner is specially formulated to remove ground in dirt and efflorescence from paving stones. Efflorescence is a white, powdery substance that forms on masonry surfaces due to the migration of salt and moisture. It can be unsightly and damage the surface if left untreated. To clean efflorescence with Seal King's acid based cleaner, you can follow these steps:

DIRECTIONS FOR EXTREME EFFLORESCENCE

- Wear goggles and rubber gloves and protect clothing appropriately
- Remove hose attachment from container
- Mix 1 part Seal King Efflorescence Cleaner to 5 parts water
- Pour into empty spray bottle or other container
- Spray/apply onto heavy Efflorescence affected surface
- After bubbling subsides Immediately scrub the surface with a stiff bristled brush
- RINSE THOROUGHLY with water to avoid accumulation of salt and remove all cleaner from surface

PLEASE NOTE

- All surfaces and environments are different, where possible, use on an inconspicuous area to ensure satisfaction and effectiveness of product
- Coverage - Approx. 800 sq.ft. / 2L 64oz
- Wait 48 hours after application before applying any sealant or other coating to the surface

DIRECTIONS FOR GENERAL APPLICATION

- Wear goggles and rubber gloves and protect clothing appropriately
- Thoroughly wet the surface with water.
- Attach garden hose to attachment sprayer.
- Push tab inwards.
- Apply, and let solution sit for 5 minutes
- Scrub the surface with a stiff bristled brush/broom
- RINSE THOROUGHLY to avoid accumulation of salt and remove all cleaner from surface

CAUTION

- Keep out of reach of children
- Keep away from mouth, skin, eyes, and clothing
- For use in well ventilated area and avoid inhaling fumes

WARRANTY

- Manufacturer's liability is limited to the replacement of the product. A proof of purchase will be required any claim
